CAREER OBJECTIVE

Motivated Computer Science graduate with hands-on experience in Python, SQL, Linux, Cloud (AWS/GCP/Azure), and modern development tools. Seeking an entry-level role to apply technical skills, follow Agile practices, and contribute to scalable solutions while continuously learning.

SKILLS

Programming & Scripting: Python (OOP, APIs) HTML, CSS, JavaScript

Databases: SQL (joins, subqueries, window functions), MySQL, MongoDB

Linux & Tools: File handling, cron jobs, SSH (PuTTY, MobaXterm)

Version Control & CI/CD: Git, GitHub, GitHub Actions, Jenkins basics

Workflow/Scheduling: Apache Airflow (DAGs, task scheduling)

Visualization: Power BI, Matplotlib, Seaborn

Cloud Basics:

- **AWS:** S3, EC2, IAM, RDS, AWS Glue, Athena, Redshift
- **GCP:** GCS, Compute Engine, Cloud SQL
- **Azure:** Blob Storage, Apache Spark, Databricks, Virtual Machines, SQL Database

Project Management & Collaboration: Jira, Slack, MS Teams, Outlook

AI Tools: LLM APIs (OpenAI), simple RAG, basic AI agent prototype

Soft Skills: Agile/Scrum, standups, sprint planning, collaboration

EDUCATION

B.E. Computer Science and Engineering | CGPA: 8.1

Sri Muthukumaran Institute of Technology (2021 – 2025)

HSC | Percentage: 80%

SSLC | Percentage: 65%

EXPERIENCE

Frontend Web Development Intern – Empower Guiding Center

- Built and styled responsive web pages using HTML, CSS, JavaScript, Bootstrap, and React.js.
- Improved UI/UX and implemented reusable components for faster development.

Data Analytics Workshop – National Small Industries Corporation (NSIC)

- Gained hands-on exposure to data cleaning, SQL queries, and visualization techniques.
 - Learned practical methods for analyzing real-world datasets and generating insights.
-

PROJECTS

Spotify Data Analytics

- Collected and analyzed Spotify track data using Spotify API and Python (Pandas, NumPy).
- Performed data cleaning and transformation to prepare structured datasets for analysis.
- Conducted Exploratory Data Analysis (EDA) on features like tempo, energy, and danceability.
- Created visualizations using Matplotlib and Seaborn to uncover feature correlations and popularity trends.
- Derived insights on music trends and user preferences, linking audio features to track popularity.

Data Engineering YouTube Analysis Project

- Ingested and processed structured & semi-structured YouTube data (CSV/JSON) from multiple sources into a centralized data lake.
- Developed scalable ETL pipelines using Python/PySpark to clean, transform, and prepare data for analytics.
- Implemented AWS services – S3 for storage, Glue for data integration, Lambda for automation, and Athena for querying large datasets.
- Secured and visualized insights through IAM role management and QuickSight dashboards showcasing trending metrics, categories, and regional patterns.
